FOOD IN
HARMONY
WITH HUMANS,
FAUNA
AND NATURE

OUR PACKAGING FOILS ARE MADE FROM **RECYCLABLE** MONO MATERIAL

THE **RAW MATERIALS** ARE OF MAINLY **REGIONAL** ORIGIN

FULL OF IMPORTANT **NUTRIENTS** AND NATURAL FLAVOURS

TO **PRESERVE** AND **SUPPORT** OUR **NATIVE BIRD SPECIES**

PRESERVE SPECIES DIVERSITY • SECURE FOOD SUPPLY • CREATE HABITATS

WHY VIVALDI® 4 SEASONS BIRD FOOD?

Due to monoculture in rural areas and urbanisation in residential areas, garden birds do not always have a sufficient natural food source, making them dependent on an additional pick source. Feeding for all four seasons with our **VIVALDI® 4 SEASONS BIRD FOOD Pick & Fly** products therefore supports the diversity of our native species. This also helps preserve bird species that are increasingly rare, thereby making a valuable and sustainable contribution to bird protection.

Our **VIVALDI®** product range is for species of wild birds that are often found in gardens and consists of high-quality, plant-based raw materials, which are almost exclusively of regional raw material origin, and manufactured at our site in Saxony/Germany into our diverse **VIVALDI®** Pick & Fly mueslis, some of which are refined in an extrusion process. The individual product packaging is designed with a reduced packaging volume, which generates less packaging waste. Our **VIVALDI®** products contain pure, natural ingredients with no preservatives, genetically-modified additives or artificial flavours.

VIVALDI® 4 SEASONS BIRD FOOD in the various muesli products and/or the unique Pick & Fly **VIVALDI® TIT PICK BAR WITH INSECTS** contain no plastic netting which can endanger birds and pollute our environment. The **VIVALDI® TIT PICK BAR WITH INSECTS** have a vertical bolt hole and can be easily mounted individually or in groups, on trees, bushes or balcony railings, etc. using the hanging aids included in the packaging.

VIVALDI® 4 SEASONS BIRD FOOD FEEDING RECOMMENDATIONS

- The feeding area should be sheltered and ideally placed out of reach of the natural predators of garden birds (cats, dogs, etc.).
- Select the feeding area to ensure that bird species that feed on the ground can also have enough VIVALDI® Pick & Fly bird food.
- Ensure there are plenty of shrubs and bushes etc. to provide adequate shelter for the birds in the wider environment around the feeding area, e.g. in the garden. The birds like to use these to remain in the feeding area and thank you with their morning and evening twitter concerts.
- Make sure the feeding areas are clean. Clean the feeding places (bird houses, etc.) at least once a week to prevent the colonisation and/or proliferation of any potential pathogens or contaminants.

**100%
natural**

**With practical
hanging aids**

**No plastic net
that pollutes the
environment**

**PROTEIN-
RICH FOR
HEALTHY
FEEDING!**
